

FIRE RETARDANT
TREATED TIMBER

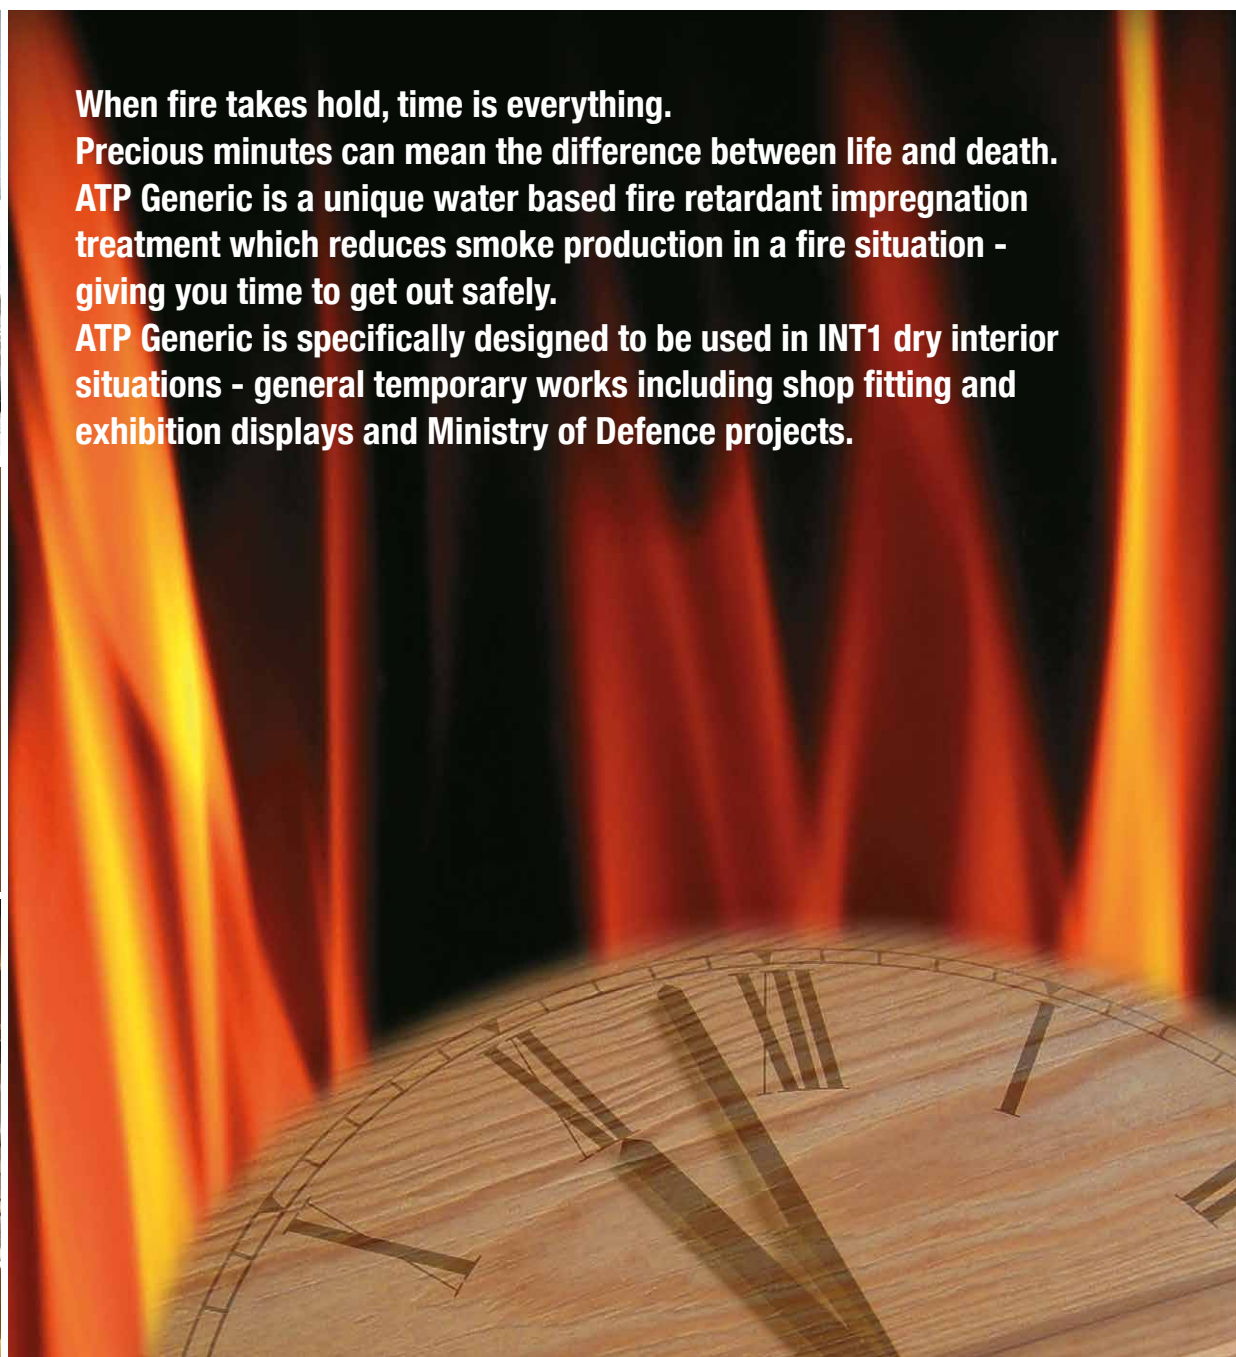

Lonza

Wood Protection

Tried, Tested and Trusted Fire Protection

When fire takes hold, time is everything. Precious minutes can mean the difference between life and death. ATP Generic is a unique water based fire retardant impregnation treatment which reduces smoke production in a fire situation - giving you time to get out safely. ATP Generic is specifically designed to be used in INT1 dry interior situations - general temporary works including shop fitting and exhibition displays and Ministry of Defence projects.

FIRE RETARDANT TREATED TIMBER

Castleford Treatment Centre

ATP Generic water based fire retardant, is a unique high pressure impregnation treatment and has been specifically designed for use in INT1 dry interior situations. Such applications include temporary exhibition displays and shop fitting projects.

ATP Generic treated timber is produced by Lonza Wood Protection, the ONLY fire retardant impregnation treatment company in the UK to hold full ISO 9001 and ISO 14001 accreditation, giving you assurance in terms of traceability and quality manufacturing processes.

Treatment lead times vary depending on the species of plywood to be treated and volume required - our Fire Retardant sales team can supply individual tailored quotes, technical advice and lead times to support treatment enquiries.

ATP Generic treated timber and plywood is fully kiln dried after treatment and its appearance remains largely unaltered. A few residual salts may be visible on the faces and edges that may need to be removed with a light sand or wipe over prior to installation.

ATP Generic treated plywood is supplied with stick marks on the main face as standard.

ATP Generic treatment:

- **has been tested by Warringtonfire and achieved Euroclass B & C classification and is fully compliant with the most up-to-date European Fire Standards**
- **is non-corrosive to all metal fixings and fastenings**
- **is approved for use by the Ministry of Defence**
- **reduces smoke production in a fire situation**
- **is a Wood Protection Association INT1, dry interior type formulation suitable for the end uses as specified above.**
